

REMARKS

The above-identified amendments add no new matter to the pending application. The amendment to the paragraph on page 67 was necessary to correct a transcribing error which occurred during translation of the priority document from German into English.

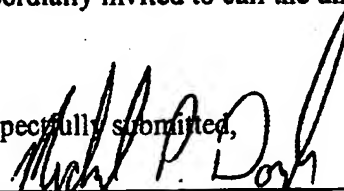

The present application claims priority to PCT/EP2003/011203, which published in German as WO 2004/035569. PCT Publication No. WO 2004/035569 discloses (as translated to English) "...The reaction mixture was stirred at room temperature for 3 hours,..." (See WO 2004/035569; Page 65, Lines 12-13). During translation of the priority document from German into English, the number "3" was omitted from the above cited passage. The present amendment merely corrects this error. As such, no new matter is added with this amendment.

Next, the amendment to page 91 merely places the chemical structure below the name of the structure (as opposed to above the name of the structure). No additional text has been added; the only amendment is the position of the structure relative to the existing text. As such, no new matter is added with this amendment.

Therefore, these amendments add no new matter to the pending application. If the Examiner believes that a telephone conversation with Applicants' attorney would expedite prosecution of this application, the Examiner is cordially invited to call the undersigned attorney of record.

Date: June 17, 2005

Respectfully submitted,
